Mohammad Yassin

Software Developer & Network Engineer

Beirut, Lebanon | Open to relocation: UAE, Saudi Arabia, Qatar | eng.compyassin@gmail.com
LinkedIn: linkedin.com/in/compengyassin | GitHub: github.com/Compzool | Portfolio: mohammadyassin.vercel.app

SUMMARY

Software developer and network engineer who writes production code and runs secure enterprise IT infrastructure. Helped run and secure a 100-site enterprise network for Edmonton Catholic Schools (Canada) on Fortinet, Aruba and Cisco. Builds REST APIs in Python (Flask, OpenAPI, MongoDB), computer vision and OCR pipelines, Flutter mobile apps, and automation in Python, PowerShell and Bash. Completing a Diploma in Cybersecurity at the American University of Beirut.

EXPERIENCE

Network Engineer, Edmonton Catholic Schools
Edmonton, Canada (Hybrid) | Full-time | Jan 2025 – Mar 2026

- Administered and secured a 100-school, multi-site enterprise network on FortiGate NGFWs, maintaining high availability across all sites.
- Designed and tuned firewall policies, site-to-site VPNs, IPS, application control, web filtering, traffic shaping and QoS.
- Ran centralized firewall operations in FortiManager; investigated threats and analyzed logs in FortiAnalyzer.
- Helped lead the migration from Cisco switching to FortiSwitch, from planning and configuration through site cutovers.
- Supported a resilient BGP, OSPF and MPLS WAN; configured VLANs, trunking, STP, inter-VLAN routing and QoS on Cisco IOS/NX-OS and FortiSwitch.
- Managed Aruba wireless through AirWave and implemented 802.1X/RADIUS authentication with Aruba ClearPass NAC.
- Built PowerShell automation for configuration validation, reporting and routine operations, cutting repetitive manual work.

Network Technician, Packet Path
Edmonton, Canada (On-site) | Part-time | Feb 2024 – Jan 2026

- Deployed and configured firewalls, managed switches and access points for enterprise and SMB clients; managed user accounts, access policies and permissions.
- Installed and terminated copper and fiber structured cabling; troubleshot hardware and connectivity on site and kept configuration records and documentation.

IT Solutions Developer, OESGROUP LLP
Edmonton, Canada | Sep 2023 – Jan 2025

- Automated repetitive accounting workflows, cutting processing time and letting the firm take on more clients.
- Built a Python/OpenCV document-processing pipeline (denoising, thresholding, contour detection, deskewing) with multilingual OCR (PaddleOCR, Tesseract) and YOLOv8 document segmentation.
- Maintained office network infrastructure, VoIP and phone systems, and IT security policies.

Back End Developer, Cloudgate Consulting DWC-LLC
Beirut, Lebanon | Feb 2022 – Aug 2023

- Built scalable REST APIs and web apps with Flask, Connexion/OpenAPI and MongoDB; refactored code to cut processing time by 20%.
- Moved heavy processing into asynchronous background task queues, removing load spikes from the main server.
- Built an automated Postman test suite that cut regression testing time by 50%.

SKILLS

Development: Python, Flask, REST APIs, OpenAPI (OAS), MongoDB, SQL, Firebase, JavaScript, React.js, Next.js, Flutter, Dart, Go, Java, C, C++, OpenCV, Computer Vision, Docker, Git, Bitbucket, Postman

Networking and security: Network Security, Fortinet (FortiGate, FortiManager, FortiAnalyzer, FortiSwitch), Aruba ClearPass, Aruba Wireless, AirWave, 802.1X, RADIUS, VPN, BGP, OSPF, MPLS, VLANs, STP, QoS, Cisco IOS, NX-OS, BlueCat

Automation: Network Automation, PowerShell, Python, Bash | **Languages:** Arabic (native), English (fluent), Spanish (basic)

EDUCATION

Diploma, Cybersecurity, American University of Beirut | Feb 2026 – Present

Bachelor of Engineering, Computer Engineering, Beirut Arab University | Sep 2018 – May 2022

PROJECTS AND PUBLICATIONS

- **SmartGasALPR-MLkit** (Flutter, Google ML Kit): mobile app with automatic license plate recognition. **Twitch Clone** (Flutter, Agora, Go): live-streaming app with real-time chat and a Go backend.
- Publications (2022): Cyber Attacks on Connected and Autonomous Vehicles (CAVs); Quality of Experience of CAVEs; FlappyBird Learns How To Beat Itself Using NEAT.
